

Melissa Spilman and Isaac

I had started using Better Balance Feeds for approx. 3 months prior to taking my 4 year old Friesian Gelding, Isaac to his first Dressage show. Before that I had been using Morglo stabilized rice bran plus other mineral supplements. Since switching to Better Balance Feeds I've noticed a better body composition on both my Friesian & my Thoroughbred. They lost that puffy appearance and now show good muscle definition. Their coats are shiny and their stamina is good. Another side perk is Isaac is less gassy. Friesians are notorious for that. Sorry, but I thought it important to mention. I plan on doing musical free style with Isaac in the future, I want to pick the music. I don't want him to play his own tune. Back to his first show. He won first place with a score of 67.83 in Training Level Test 1. I was very proud of him. He just stayed focused and did his job. I'm glad I found Better Balance Feeds, I think it has helped give us a winning edge.

Sincerely,

Melissa Spilman
Temecula, CA

“I have my horses on BBF and they look great, stay calm and perform the way I need them to.”

Winner CHAMPIONS OF THE SHERRIE GILKERSON MEMORIAL OPEN BRIDLE SPECTACULAR

Dave Rawdon and AQHA Peppy Intense Choice (RB)

Dear DJ,

I am very grateful that you introduced me to Better Balance Feeds. I can remember working my Reining horse in preparation for competition and he just seemed lethargic about half way through our exercises, and I couldn't keep weight on him. I had tried a series of supplements since I've been riding him the past 4 -1/2 years (see attached). None of which had results that I was satisfied with. Some would "Fatten" him up, others would make him too "Hot" and others simply had no bearing detectable and/or positive effects on him. I follow the philosophy that; "If you treat and feed them as champions, they will be champions".

When you explained to me what BBF could do, and knowing how hard we practice, I was a little skeptical, i.e.; something new, unheard of back in Indiana where I came from, and this could just be another gimmick. I'm happy to say, it IS NOT a gimmick! My 6 year old Reiner, "RB", is healthier now than he has ever been since I purchased him as a youngster. It makes no difference how hard we work, or compete, he still has a reserve of energy, good energy. He doesn't get "Hot" from the pellets, he is fit, solid as a rock, I have no trouble keeping weight on him from such stringent training, and his mind is still focused on his job, and... as a bonus, the farrier sees marked improvement in his feet. People ask me what I shampoo him with because his coat is so shiny.

As a side bar to my 6 year old, I'm training a 2 yr. old reining prospect. She is also being fed BBF, and I can also see positive results in her energy levels and growth in her training as well, besides the same comments on her coat and feet.

Thanks DJ for not giving me just a "Sales Pitch". What you bring to me in those simple white bags every month is worth every nickel I spend for BBF.

Better Balance Feeds

Dear Mr. Silva,

I breed, train, and show top level jumpers. All of my horses are Warmblood horses registered with the Studbook Zangersheide. I have licensed stallions, broodmares, and foals that have pedigrees of the highest caliber jumping horse bloodlines world wide. When I went looking for a feed that would meet my horses' nutritional needs I found an enormous number of feeds on the market that all "claim the same". I was looking for a feed that was more nutritionally advanced; that could step up and supply the nutritional needs of "the super horse". Through the insistence of an equine nutritionist, I tried Better Balance Feeds. Better Balance Feeds took the challenge and beat the competitors, hands down!

I have tried many feeds that are supposed to meet The National Research Council for Equine Nutrition (NRCs) standards and some of them were billed as a SAFE CHOICE in feeds. None of these feeds comes close or even compares to the nutritional value that Better Balance Feeds offers. Better Balance Feeds is nutritionally advanced in their formulations. I have never seen better feet and coats on my horses. I have seen marked improvements in hoof condition as well as growth. Their coats and hair are soft and luxurious with shine so deep that it looks like wet paint. They maintain better conditioning even during rigorous training. My horses have sustainable energy that is controllable while maintaining sound minds and willing attitudes to learn and do.

As a top athletic competitor, myself, I understand the need for high quality balanced nutrition. Better Balance Feeds has taken the reins by developing balanced feed that is on the same high standards that we have come to expect in human nutrition, only this is for the horse. Better Balance Feeds meets and exceeds the nutritional needs of the modern equine athlete. I want to thank you for making my horses healthier and happier to do their jobs and making my life a little less stressful. Better Balance Feed has exceeded all my expectations. Better Balance Feeds is the only choice, because it is the right choice for my horses' nutritional health.

Respectfully,

Linda Goorigian

Goorigian Farms, the breeders of Zangersheide Warmblood Sport Horses

"Since I started feeding Better Balance feeds and vitamin supplements, I have noticed a significant improvement in performance and more consistent energy levels in all of my horses."

Have a Super Day!

Thom Read

I have now been using the BBF for almost 3 months and I am amazed in the condition of my horses. Their coat and hoof conditions have improved since starting the BBF program. I am no longer having to feed extra coat, hoof and joint supplements, which makes feeding a snap, especially while on the road traveling to shows. Not only are my horses looking better, but they are also working better too, and my cost to feed each horse is less than before starting the BBF program. I recommend this product to anyone who wants to feed the best and feel great about the results they see in the new condition of their horses. (picture above)

Tiffany De Roza

My horses look great! I'm telling everyone about Better Balance Feeds. Their feet and coats look great, and their muscle tone looks good even on the horses that don't get ridden much. I'm really happy with this feed!

“I know that I’m feeding my horse the best. Do you?”
Mark Scobie on BETTER BALANCE FEEDS

“Better Balance Feeds is a great all around feed with great results. It allows my horse to look and feel its best without getting too hot or nervous. Natural talent will only take you so far. BBF gives me an edge.”

Dugan Kelly

“I started my mares on BBF at 9 months gestation. The mares all have beautiful shiny coats and an overall healthy glow. They love the taste of the BBF feeds, and I love it because it is easy to use. We have 2 foals, both colts, to date with one born 3 weeks early. Both are large healthy and doing great. I recommend feeding Better Balance Feeds and will continue to use it. I also and have started several other breeders on it and they like it too.”

Melissa Ferrell

California Dreamin Arabians

Two weeks old

Day one

"Great hair coat, winter coats shed off early and looks good and slick, the feet are getting tougher, and the horses are calmer".

"The hair looks as good as it ever has, and the horses like it too!"

"Easy to use and there is no guess work."

Jonna Spaleta

Escalon, California

Burnie at 18 years old looks and runs like he's only 8. He's on Better Balance Feed formula #3 for alfalfa. His coat and feet look great! All 7 of our horses get Better Balance Feeds.
