Quality Equine Nutrition Products

## SUPER NUTRITIONAL FIBERS

SUPER NUTRITIONAL FIBERS (SNF) used in BBF Feeds are  
Soybean Hulls, Beet Pulp, Almond Hulls

SUPER NUTRITIONAL FIBERS used in BFF Feeds have many of the benefits of  
the fiber that is natural to the wild horses diet ( pasture, hay).

SNF have energy levels that are close to oats but are safer because of the  
high fiber in these feedstuffs.

Digestibility of these SNF are very high and do not cause the grain overload  
that many grains fed at high levels can.

SNF are generally palatable to horses.

Wheat Middlings and Wheat Mill Run are **NOT** super nutritional fibers

SUPER NUTRITIONAL FIBERS cost more than Wheat Middlings and Wheat Mill  
run because they are better ingredients for use in feeds for many  
types of animals not just horses.
