

Better Balance Feeds Fact Sheet #2

Why use the BBF system of feeding for your horse?

Safe and Complete Nutrition

Unlike many animals, horses should be fed as individuals, so what works for one horse may not work for your horse. One complete feed does not fit all horses.

By using the BBF system you can fine-tune your feeding program to your horse and your horse's work level without over-feeding protein and trace minerals and under feeding forage.

If your horse is in a stress situation (travel, worming, etc.) you can increase the level of vitamins and trace minerals without feeding more bagged feed and avoiding more calories and protein that your horse does not need.

If your horse is a hard keeper and has trouble keeping his weight on you can feed extra forage & BBF bagged feed without overfeeding vitamin and trace mineral levels that can hurt your horse.

The Better Balance Feeding System Gives Your Horse

Highly digestible fiber rich feed- With Super Nutritional Fibers
for a more natural feed with safe energy levels

Wide spectrum of balanced amino acids-
for protein usage in muscle building, maintenance and repair

Optimum levels of vitamins and trace minerals-
for good health and enzyme activity for efficient use of feeds

Proprietary "Foundation" add pack-
scientifically researched to aid in digestion and gut health for better usage of feed and less gut problems
